Line Striping

In today's safety conscious workplace, line striping has become a must. 4" safety lines provide crisp aisle ways, less cluttered work areas, and most importantly, fulfill OSHA requirements.

In order to provide clean, sharp edges, we pre-measure and tape apply all layout. We then roller apply 2 coats of a fast drying epoxy and remove all tape.

Most warehouses can be done in 1 day, and with the fast drying nature of the product, foot traffic is allowable the very next day.
